# Test Summary Report

Introduction
In this report, I give a quick look at how testing went for the Admin's page. I'll focus on the results, share details about the test environment, and give a summary of the whole system.

Test Scope
I will check the Admin's page really well, looking at the important parts to find any issues that might affect how it works and how users experience it. The goal is to make sure that it works reliably and does what it's supposed to do.

Results

Test cases planned	Test cases executed	TCs passed	TCs Failed
20	20	6	14

■ TC passed ■ TC failed

Bugs found: 27

	High	Medium	Low
Priority	13	10	5
Severity	9	9	10

Test environment

Operating System: Mac OS Sonoma 14.1.2
Browser: Google Chrome 120.0.6099.129
Execution Time: 7.2h

Summary
The admin page for adding products is completely nonfunctional due to critical bugs affecting visuals, logic, and usability. Urgent action is needed to rectify these issues and restore essential functionality. Detailed bug reports, including visuals and steps to reproduce, have been submitted for immediate attention.
